

# Concrete & Graphex: The Best Of Both Worlds.

Our unique combination of the Graphex™ wall panels, bracing system, and Concrete supplies superior strength and endurance.

**The Patio Support System:**  
Walls and K-Braces are integrated into the concrete pool base, concrete patio, and concrete bond beam.

**Exclusive Mate-Lock System**  
assures positive alignment of Graphex™ wall panels.

Concrete  
Patio

Concrete  
Pool Base

Graphex™ wall panels and braces carry a lifetime, non-prorated, transferable warranty.

Concrete  
Bond Beam

Graphex™ wall panels and braces will never rust, corrode, chip, peel or degrade.

**Unique honeycomb design and five horizontal ribs**  
surrounding the pool add extra strength and integrity to the walls.

## Making things as painless as possible.

"P" stands for polymer, and that stands for "permanent." It also stands for "Pacific Pools," the only pool manufacturer with exclusive Graphex™ technology that takes that polymer recipe and makes extremely strong and durable products.

I didn't know Graphex from Spandex, but it's made all the difference. It won't rust or corrode, won't decay or dent, and won't chip or degrade. What it does is stay strong and flexible for decades.

Pacific Pools has over 45 years' experience manufacturing pools. They don't just talk the talk; they walk the walk by offering a lifetime transferable warranty. Of course, we took them up on it.
